RELIABLE MULTICAST USING MERGED ACKNOWLEDGEMENTS

Hans Eberle
Nils Gura

ABSTRACT OF THE DISCLOSURE

5   A source multicasts information to a plurality of targets. The targets respond to the multicast information by sending acknowledgements that indicate receipt of the multicast information. The acknowledgements are merged into a merged acknowledegment, which is then supplied to the source. The source can determine from the merged acknowledgement whether the targets successfully received the

10   multicast information.
